Current Responsibility

Li Feng is an actuarial analyst with the Life Practice in Milliman's Seattle office. She joined the firm in 2013.

Professional Work Experience

Li assists clients with statutory and GAAP MG-ALFA® model validation, valuation and financial reporting.

Li has data management experience in Microsoft Access and SQL Server. She is proficient in VBA, SQL, C++, and C#.

Recent experience includes:

- Modeling with MG-ALFA in valuation, financial reporting, model governance, and model conversion
- Developing automated financial reporting processes to improve efficiency and control across reporting regimes
- Developing a user-driven interface tool for experience analysis based on VM-20 using C#.

Professional Designations

- Data manipulation and analysis: Microsoft Excel and VBA, R, Python
- Database: Microsoft Access, Microsoft SQL Server
- Software development: C#

Education

- MS, Computational Finance and Risk Management, University of Washington
- BS, Information and Computing Science, University of Science and Technology Beijing
